Remarks concerning this product:-

Please be aware Dyson V11™ vacuum

cleaners use two types of battery. Some use a click-in battery, while others use a standard screw-in battery. It's important to understand which battery your Dyson V11™ vacuum requires. You will be able to tell by checking your machine where the handle meets the battery. If there is a large red button that releases your battery then your machine will need the click-in battery which is the CS-DYC180VX as shown below.

if this isn't the case then please proceed by selecting the standard screw-in battery.
